

# Find the Mixed Equivalent Fractions

LO: I can write the equivalent fraction.

Fill in the numerator to make the fractions equivalent.

1.

$$\frac{1}{2} = \frac{\square}{4}$$

2.

$$\frac{1}{12} = \frac{\square}{24}$$

3.

$$\frac{1}{10} = \frac{\square}{20}$$

4.

$$\frac{1}{8} = \frac{\square}{16}$$

5.

$$\frac{3}{20} = \frac{\square}{40}$$

6.

$$\frac{1}{6} = \frac{\square}{12}$$

7.

$$\frac{1}{5} = \frac{\square}{10}$$

8.

$$\frac{1}{4} = \frac{\square}{16}$$

9.

$$\frac{3}{10} = \frac{\square}{20}$$

10.

$$\frac{1}{3} = \frac{\square}{12}$$

11.

$$\frac{7}{20} = \frac{\square}{40}$$

12.

$$\frac{3}{8} = \frac{\square}{16}$$

13.

$$\frac{2}{5} = \frac{\square}{20}$$

14.

$$\frac{5}{12} = \frac{\square}{24}$$

15.

$$\frac{19}{20} = \frac{\square}{40}$$

16.

$$\frac{3}{5} = \frac{\square}{20}$$

17.

$$\frac{5}{8} = \frac{\square}{16}$$

18.

$$\frac{2}{3} = \frac{\square}{6}$$

19.

$$\frac{3}{4} = \frac{\square}{8}$$

20.

$$\frac{4}{5} = \frac{\square}{10}$$

21.

$$\frac{5}{6} = \frac{\square}{12}$$

22.

$$\frac{7}{8} = \frac{\square}{16}$$

23.

$$\frac{9}{10} = \frac{\square}{40}$$

24.

$$\frac{11}{12} = \frac{\square}{24}$$

# Find the Equivalent Fractions **Answers**

Fill in the numerator to make the fractions equivalent.

| Question | Answer |
|----------|--------|
| 1        | 2      |
| 2        | 2      |
| 3        | 2      |
| 4        | 2      |
| 5        | 6      |
| 6        | 2      |
| 7        | 2      |
| 8        | 4      |
| 9        | 6      |
| 10       | 4      |
| 11       | 14     |
| 12       | 6      |

| Question | Answer |
|----------|--------|
| 13       | 8      |
| 14       | 10     |
| 15       | 38     |
| 16       | 12     |
| 17       | 10     |
| 18       | 4      |
| 19       | 6      |
| 20       | 8      |
| 21       | 10     |
| 22       | 14     |
| 23       | 36     |
| 24       | 22     |
